SUMMARY

Highly accomplished Frontend Developer with over 5 years of experience specializing in building modern, scalable, and interactive web applications. Proficient in React.js, JavaScript, and TypeScript, with a strong background in state management, API integration, and performance optimization. Adept at developing complex user interfaces, ensuring cross-browser compatibility, and contributing to high-quality production systems. Committed to delivering robust and user-centric solutions.

EXPERIENCE

Full-stack (FE Heavy) Developer March 2024 - Present
Nzmlly Remote

- Led storefront migration to Next.js 16 + React 19 + Chakra UI v3 (~200 files) with full RTL/bilingual support and Turbopack build integration.
- Built responsive Puck Editor page builder blocks using Chakra's native Carousel, container queries, and ResizeObserver-driven breakpoints.
- Delivered full-stack features end-to-end across a NestJS/GraphQL backend and Next.js frontends: customer reviews, paginated events, payout module spanning 3 repos.
- Established E2E test coverage with Playwright covering full customer booking journeys across multiple product types.

Frontend Developer May 2024 - October 2024
ActivePieces Remote

- Developed an AI-driven workflow builder within an Angular application, enhancing user experience for automation creation
- Integrated OpenAI APIs to translate natural language prompts into dynamic UI-driven automation flows
- Built internal CLI tooling to convert OpenAPI schemas into modular, reusable integrations
- Optimized performance and responsiveness by refining data processing and reducing API payload size
- Collaborated on a smart HTTP request generator bridging UI inputs with backend API logic

Frontend Developer February 2022 - May 2023
LNKR Remote

- Expanded Clinic Management System with key features including appointment-scheduling, E-prescription, and E-pharmacy.
- Integrated frontend with Django-built APIs to ensure robust system functionality.

Junior Frontend Developer July 2021 - June 2022
Springy Universe Remote

- Improved admin panel using ReactJS and Redux + NodeJS APIs implementation impacting 10K+ users.
- Translated Figma designs into pixel-perfect frontend applications, maintaining high UI quality.

SKILLS

HTML5 CSS3 JavaScript
TypeScript React.js Next.js
Redux React Query Git
Performance Optimization
Arabic language handling and localization
RESTful APIs Unit testing ChakraUI
Web application development
Health-tech Applications AI tools
Collaboration Communication
Agile Methodologies Problem-solving

PROJECTS

ActivePieces 🔗

Engineered an AI-driven workflow generation system using Angular and OpenAI APIs, enabling dynamic creation of API-based automations from user prompts. Built internal tooling (CLI) to convert OpenAPI schemas into modular integrations, and enhanced system efficiency through HTML-to-markdown preprocessing and prompt optimization.

Nzmlly 🔗

Booking SaaS built on a NestJS monorepo (GraphQL APIs, RabbitMQ consumers, Bull workers) with Next.js dashboard and storefront. Led the frontend migration to Next.js 16 + React 19 + Chakra v3 across 222 files, built visual page builder blocks leveraging Chakra's Carousel state machine with container-query responsive breakpoints, delivered full-stack features (reviews, events, payouts, tracking) across three repositories with schema-first GraphQL.

EDUCATION

Bachelor's degree in Computer Science

Institution of information management & technology

January 2020 - December 2024
